RV Tank Filtration System Sediment Removal & Scale Inhibitor

This Anti-scale media sequesters hardness from forming scale in water.

| Lab Results | | | | | | |
|-----------------------|-----------|--------------------|------------------|------------------|---------------------------|---------------------------|
| Parameter | USEPA MCL | Influent Challenge | Effluent Average | Effluent Maximum | Percent Reduction Average | Percent Reduction Minimum |
| Particulate Reduction | - | 2,086,110 | 25,525 | 72,800 | 98.8 | 96.5 |

Operating Specifications

Rated Capacity: Dependent upon the quality of the influent water
 Service Flow Rate: 1.67 GPM (6.3LPM)
 Pressure: 125 PSIG max
 Temperature: 35-100° F (2-38° C)

General Installation/Operation/Maintenance Requirements

Note flow direction upon installation of filter.
 Flush new cartridge with 5 gallons of water prior to use.
 Replace cartridge annually or when rated capacity is reached.

Note: Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected waters that may contain filterable cysts.
